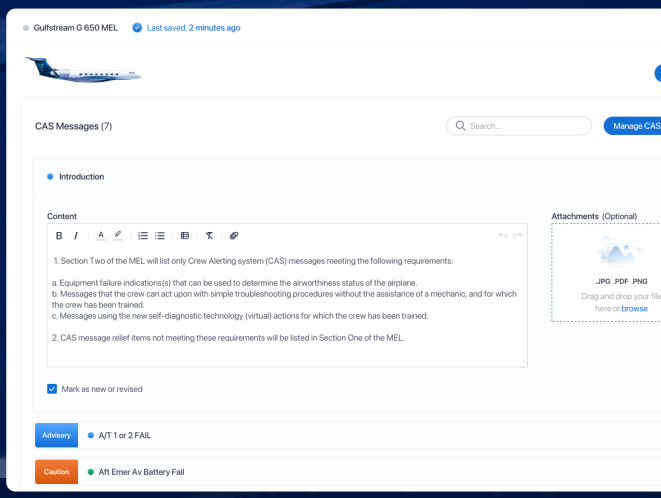
TrustFlight

Integrated Safety at Every Elevation™

MEL Manager

Automate, revise, and publish error-free, fully-compliant Minimum Equipment Lists (MELs) in under an hour.



Approved by global regulators

Civil Aviation Authority · Federal Aviation Administration · EASA European Aviation Safety Agency · BCAA Bermuda Civil Aviation Authority · Transport Canada

Save time, reduce errors, and eliminate compliance risks with the one-of-a-kind TrustFlight MEL Manager.

Create error-free MELs in under an hour

Create MELs in under an hour using smart workflows and type-specific templates with a purpose-built app.

Improve regulatory approval times

Speed up approval times with our regulator-friendly interface and pre-approved, proof-checked content.

Reduce your risk of findings to zero

Automatically incorporate MMEL/DDG revisions while preserving your operator-specific content, ensuring zero risk of findings.

Key Features

- Fully web-based application that provides complete oversight and controls over your MELs
- User-friendly dashboard allows for easy oversight of MELs to help ensure they're kept up-to-date within tight regulatory timelines
- Automatic formatting allows for MELs to be exported in a compliant and easily readable PDF.
- The Smart Editor allows for easy configuration of MELs based on operational profile, including functionality to aid review cycles and publication
- Integrated with TrustFlight Electronic Logbook (ELB/ETL) to take advantage of powerful digital MEL workflows

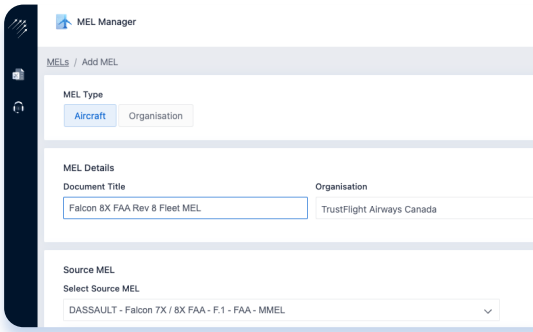
How it works

STEP 1 Create

Create an MEL from scratch.

Issuing a new MEL is as simple as selecting the type specific template and using our powerful platform to alter the procedures and items to fit your operation.

- Complete MEL creation without any need to format.
- Full library of existing templates tailored to your aircraft type and type certificate (FAA, TC, EASA), regularly updated.
- Easy-to-use, but powerful, web platform.
- Fully-compliant MELs issued digitally or for printing.

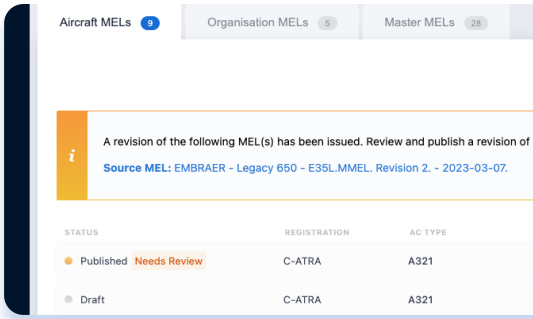


STEP 2 Revise

Once a revision of the MMEL/DDG is issued, review the changes made.

As revisions to the MMEL or DDG are issued, these changes are automatically identified by our platform and made available to your aircraft MEL.

- Issue MEL revisions with just a few clicks.
- Changes automatically identified when new revisions are raised.
- Ensure consistency between MELs by auto-applying changes.
- Prepare changes for the entire fleet ready for the next MEL issuance.

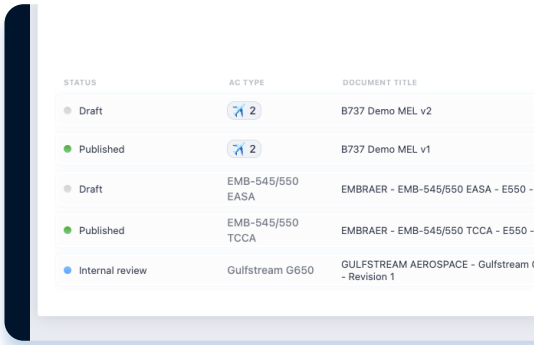


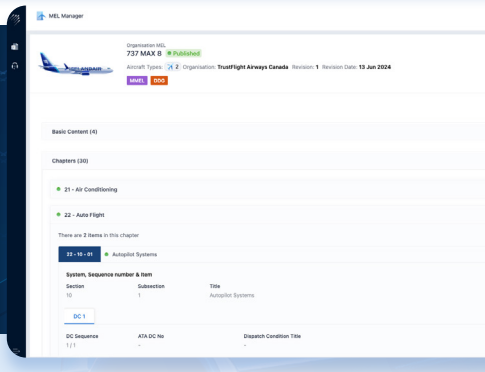
STEP 3 Publish

Publish revisions and issue MELs digitally, consistently, and error-free.

Once new revisions are created and revised, only minor changes may be required to align with your operation. Leave the control of the source content changes and formatting to MEL Manager.

- Simplified MEL viewing through the web portal.
- Fully integrated with the TrustFlight Tech Log.
- MEL reviewing system for your regulator.
- Full PDF export support to enable continued MEL distribution.





Request a Demo

The MEL Manager is full integrated with the TrustFlight suite.
