

AI-native manual authoring, built for Centrik.

SmartDocs adds aviation-specific authoring, review, and approval to Centrik. Publishes natively into the Centrik Documents module for distribution, EFB access, and read-and-sign — no user migration, no document migration, no new EFB approval.

What It Does For Your Team

01

Create compliant manuals faster

Aviation workflows, generated compliance pages, and AI that already knows your manuals replace 3,000+ hours of yearly Word revisions for a typical business jet operator.

02

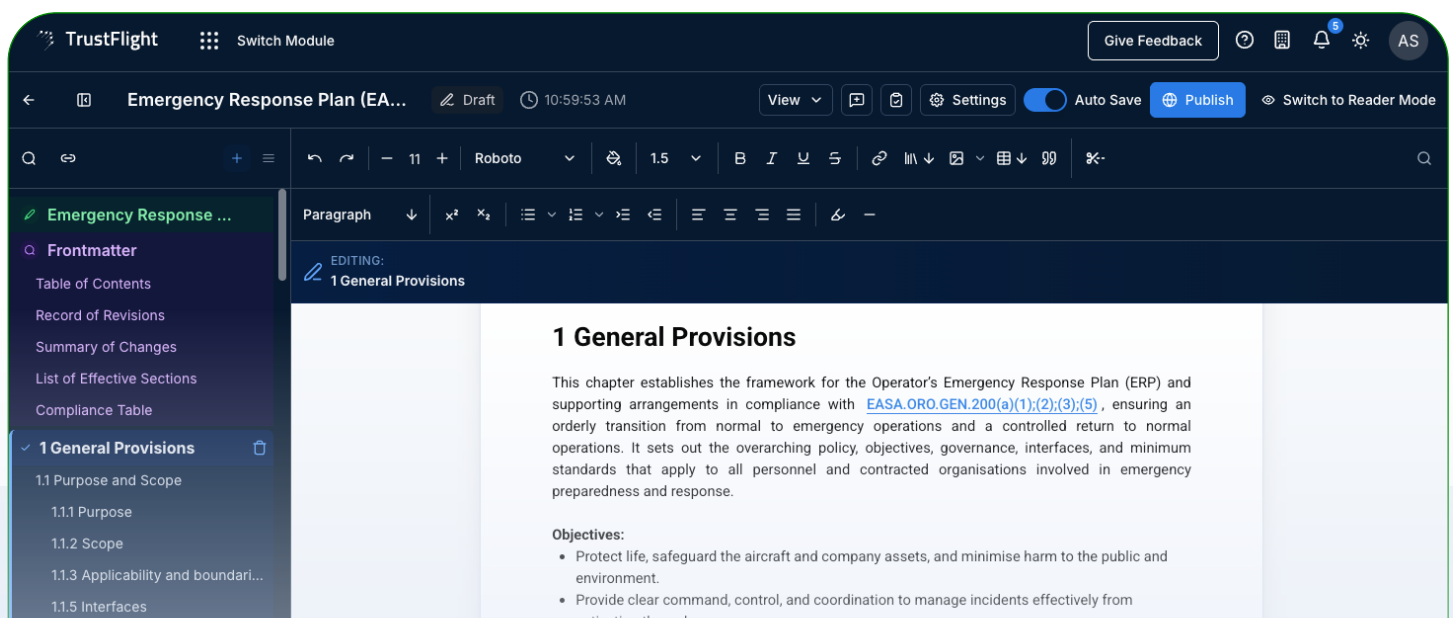

Built on the same regulations as Centrik

Reference links connect manual sections to the same regulation library that powers Centrik. When a regulation changes, SmartDocs flags every dependent section before publication.

03

No migration. No new EFB approval

Documents publish into the Centrik Documents module. Your readers keep using Centrik desktop and EFB. Distribution lists, document types, and read-and-sign stay where they are.

Why SmartDocs

Centrik-Native Distribution

Documents publish straight into the Centrik Documents module. Your crews keep using the desktop app and EFB they already trust.

AI Grounded in Your Regulations

The AI Document Assistant draws on your manuals and your regulation library. Every suggestion is reviewed before it is incorporated.

Built on Your Centrik Regulation Library

The AI Document Assistant draws on the same regulations that power Centrik. Every suggestion is reviewed by a human before it lands.

Unlimited Authors & Readers

Pay based on the size of your business, not your team. AI is included. No per-user metering, no per-author or per-reader fees.

Inside SmartDocs

Authoring & AI

- Word-style editor with enforced aviation structure
- AI Document Assistant, grounded in your manuals and regulations
- AI Templates and Importer: generate templates from regs, convert existing manuals from PDF

Compliance & Traceability

- Reference links to regulations, with link integrity monitoring
- Lists of Effective Sections, Records of Revision, Summaries of Change generated for you
- Configurable multi-step review and approval workflow

Collaboration & Distribution

- Text-anchored change requests, tracked through publication
- Granular version comparison
- Read and Acknowledge with reader tracking; iPad reader with offline support

How It Fits With Centrik 5

AUTHOR
SmartDocs

PUBLISH & MANAGE
Centrik Documents

READ
Centrik Desktop • EFB

Authoring in SmartDocs.
Distribution stays in Centrik.

Readers keep using the Centrik desktop app and EFB.

Centrik regulations power SmartRegs and reference links.

Distribution lists, document types, read-and-sign stay put.

See it for yourself. Book a 60-minute demo with the SmartDocs team.
