

Centrik 5

Enhanced safety and operational efficiency with the world's most powerful and complete quality and safety management system.

Approved by + many more

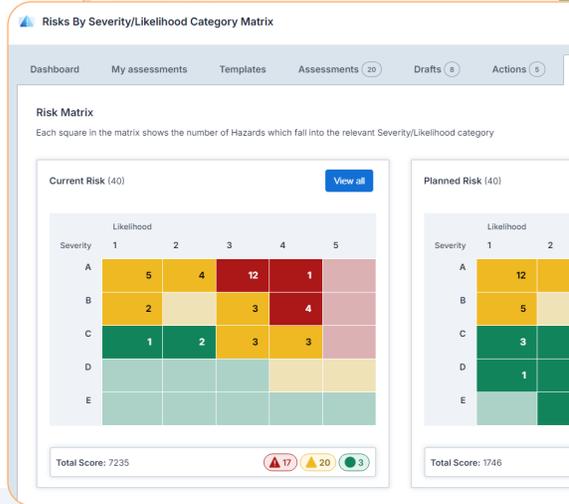

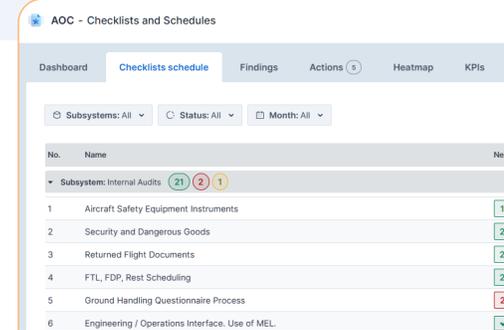

Serving Business Aviation Commercial Airlines Special Missions NAA Training Orgs. Regulators

The leading integrated safety, risk, and quality management system for aerospace and aviation

- Stay compliant with real-time regulations alerting**
Centrik's real-time regulations module helps quality and safety professionals stay ahead of updates.
- Eliminate error-prone, paper-based processes**
Eliminate time-consuming paperwork tasks through automation to eliminate transcription errors and reduce lag.
- Reduce risk while increasing safety**
Significantly reduce the administrative burden associated with internal and external findings.

Key Features

- Management dashboards deliver company-wide, real-time monitoring of your entire business.
- Cloud-based, accessible on any browser with iOS and Android apps.
- Regulations review and update service, embedded regulations linked to audit checklists.
- Interactive Documents, Safety, Risk, and Compliance modules drive enhanced QMS/SMS performance, oversight, and much more.
- Powerful Meetings, Workflows, and Training modules streamline the process and improve operational efficiency.
- Real-time KPIs/Metrics (SPIs and QPIs) at the click of a button show previously unseen organizational performance data for informed decision making.
- Our system automatically detects amendments, additions, and deletions across 120+ frameworks and instantly notifies users of their potential impact.

Intuitive Modules

-  **Dashboard**
Role-based dashboards give users access only to what's relevant to them, using an intuitive traffic-light system to quickly assess task status and instantly assign actions.
-  **Documents**
Streamlined document tracking to save time and provide instant audit evidence, while protecting files from unauthorised access, damage, alteration and theft, and reducing the administrative burden of document control.
-  **Safety**
Risk heat maps clearly highlight your biggest risks, with real-time risk score updates as safety reports are managed and instant analysis that lets you drill into data for greater SMS visibility.
-  **Risk**
Real-time risk oversight with the module's holistic view of your organisation, monitoring residual risk trends and using intuitive heatmaps for an instant graphical picture of risk status and direction.
-  **Workflows**
Bring order to chaos with quick, effective task management for users and enhanced end-to-end process visibility for managers.
-  **Equipment**
Let the software do the heavy lifting by eliminating duplication, errors and lost time often associated with managing assets.
-  **Training**
Keep all training records one click away, with training data accessible from anywhere—office, hangar, cockpit or sim.
-  **Compliance**
Perform your audit once with no duplication, paper trails or repeated data entry, saving time and reducing the risk of human error.
-  **Meetings**
Schedule meetings in seconds with associated real-time KPIs, manage internal and external attendees, take minutes in-meeting, review past actions and assign new ones, then finalise and distribute minutes.

Comprehensive Suite of Products

-  **Tech Log**
Empowering your team with a compliant electronic tech log, automated maintenance workflows, and robust data capture.
-  **MEL Manager**
Purpose-built MEL software that provides comprehensive oversight while automating MEL creation, revision, and compliance.
-  **Smart Suite**
AI-assisted document authoring platform, supporting creation and maintenance of manuals and regulated content through structured documents.
