

# Centrik 5

## SMS, QMS, & Risk

Enhanced safety and operational efficiency with the world's most powerful quality and safety management system.

Approved by  
global regulators

Australian Government  
Civil Aviation Safety Authority

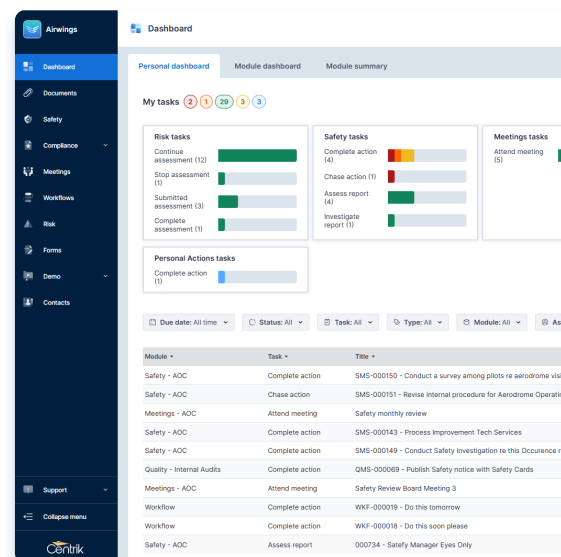

+ many more

## Trusted by leading aerospace operators across the globe.

-  **Stay compliant with real-time regulations alerting**  
Centrik's real-time regulations module helps quality and safety professionals stay ahead of updates.
-  **Eliminate error-prone, paper-based processes**  
Eliminate time-consuming paperwork tasks through automation to eliminate transcription errors and reduce lag.
-  **Reduce risk while increasing safety**  
Significantly reduce the administrative burden associated with internal and external findings.

## Key Features

- Management dashboards deliver company-wide, real-time monitoring of your entire business.
- Cloud-based, accessible on any browser with iOS and Android apps.
- Regulations review and update service—embedded regulations linked to audit checklists.
- Interactive Documents, Safety, Risk, and Compliance modules drive enhanced QMS/SMS performance, oversight, and much more.
- Powerful Meetings, Workflows, and Training modules streamline the process and improve operational efficiency.
- Real-time KPIs/Metrics (SPIs and QPIs) at the click of a button show previously unseen organizational performance data for informed decision making.
