

Smart Regulations

Advanced AI Agent framework, transforming regulatory compliance within the aviation industry.

Approved by
global regulators

Australian Government
Civil Aviation Safety Authority

+ many more

Comprehensive, accurate, and efficient AI-driven regulatory management and document integration.

- 
Extensive Regulations Database
 Coverage of over 120 global aviation regulations with continuous updates, amendment tracking, side-by-side comparisons, and an intuitive interface for easy searching, navigation, and sharing across systems.
- 
Advanced AI Regulatory Agent
 Intelligent, context-aware query handling delivering accurate, cited responses with direct references, and the ability to perform complex, concurrent regulatory analyses through specialized agents working in parallel.
- 
Works with any Application
 Embedded drafting assistance for critical documents (FOMs, Ops Manuals, SOPs), with automated regulatory-based suggestions, instant update alerts, and comprehensive auto-compliance checks and auditing.

Key Features

INSTANT REGULATORY CLARITY

Direct answers and immediate access to precise regulatory texts and amendments.

OPERATIONAL AGILITY

Simplifies navigating complex global aviation regulations, significantly accelerating decision-making.

REDUCED COMPLIANCE RISK

Mitigates errors associated with manual regulation research, improving overall compliance reliability.

CROSS-JURISDICTIONAL EFFICIENCY

Ability to quickly compare multiple aviation regulatory frameworks on-demand, ideal for international operators.

TIME SAVINGS & EFFICIENCY

Significant reduction in manual research and document updates, freeing teams to focus on higher-value tasks.

REDUCED RISK OF NONCOMPLIANCE

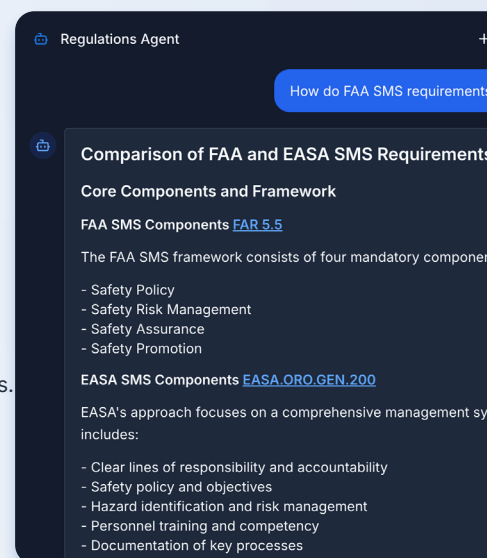

Automated updates and recommendations drastically lower the risk of oversight and regulatory gaps.

IMPROVED COLLABORATION

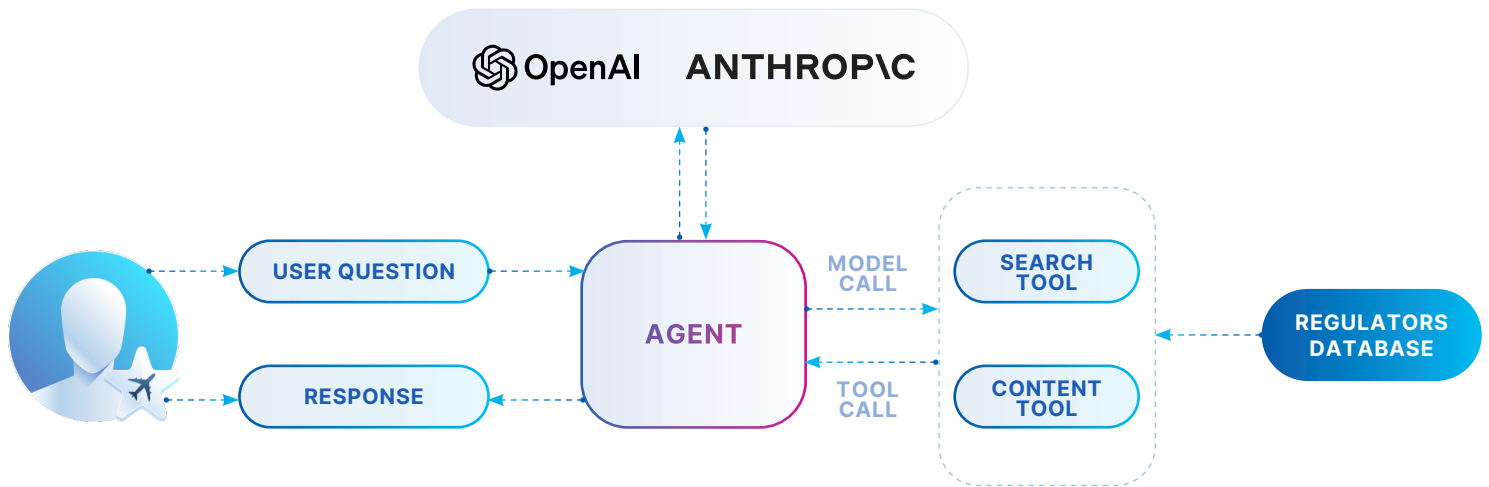

Multiple teams—compliance, safety, document management—work on a unified platform that keeps everyone aligned on the latest requirements.

ONGOING INNOVATION

As SmartRegs continues to evolve, AI-driven recommendations become more sophisticated, unlocking higher degrees of automation and proactive compliance management.

Smart Regulations Agentic Framework

COMPLIANCE OFFICERS

Automated Regulation Updates - Compliance Officers get proactive alerts on rule changes (e.g., EASA, FAA), plus recommended edits to maintain compliance.

Evidence Gathering for Audits - Compliance teams quickly gather and link relevant evidence by querying the AI agent (e.g., flight time limits for specific aircraft).

SAFETY MANAGERS

Realtime Impact Analysis - For any regulatory update, the agent flags affected manual sections and suggests revised workflows.

Incident Investigation & Prevention - Safety Managers receive targeted regulatory references and SOP update suggestions for incident reporting queries.

DOCUMENT MANAGERS

Smart Documents Integration - While drafting manuals, managers can query the agent for latest requirements (e.g., FAA flight data recorders), with instant, aligned text proposals.

Change Tracking & Version Control - Every regulation-driven revision is recorded for clear version comparisons and audit-ready documentation.

REGULATORY AUTHORITIES

Efficient Oversight - Authorities easily verify that regulatory changes are fully reflected across manuals and safety documents.

Harmonized International Standards - With 120+ global frameworks in SmartRegs, multi-region authorities seamlessly cross-check compliance.

FLIGHT OPERATIONS MANAGERS

Rapid Ops Manual Updates - Flight Ops Managers quickly generate procedure updates for seasonal routes or fleet changes, based on latest regulations.

Crew Training Alignment - Training materials are linked directly to current regulations, keeping pilots and crew up to date.

Our Products Suite

Tech Log

Improve safety, reduce risk, and enhance efficiency by eliminating paper-based processes.

Centrik 5

The all-in-one system for managing Risk, Safety, Compliance, Documents, Training, EFBs, and more.

MEL Manager

Issue and revise Minimum Equipment Lists (MELs) with ease for your entire fleet.

Smart Documents

The ultimate documentation platform for aerospace and aviation professionals.

Serving all Aviation End Markets
