Canada

Improve safety, reduce risk, and enhance efficiency by eliminating outdated paper-based processes.

-  **Gain real-time overview of your entire fleet**
With validated, real-time records coming in from both flight crew and maintenance, your fleet status will be up to date and accurate.
-  **Eliminate error-prone, paper-based processes**
Eliminate time-consuming paperwork tasks through automation to eliminate transcription errors.
-  **Improve operator safety and efficiency**
Remove operational risks with real-time communications between flight ops and maintenance teams.

Key Features

- A fully digitized aircraft technical and journey log for flight ops and maintenance teams
- Intuitive workflows for recording defects, with step-by-step MEL deferrals
- Intelligent workflows and validations that catch errors and ensure compliance
- Powerful integrations with your existing maintenance and flight scheduling software
- Customizable and configurable based on operational requirements

Platform Benefits

Available now

Robust Platform Capabilities

Industry Leading UX and UI, Smart Workflows and Custom Fields, Dedicated iOS Applications, Advanced APIs, Powerful Dashboards, Multi-AOC Support, SSO, and more.

Flight Log

Flight and Journey Log, Custom PDF Tech/Journey Log Pages, SMS Integration, FRAT Module, Scheduling Integration, Customizable Fuel Uplifts, Refueling Receipts.

Defect Reporting

Defect Log, Cabin Log with Interactive Layout, Custom Deferred Log Page, Intermittent Faults, Deferral Management (MEL, CDL, NEF), Embedded MELs with (O)&(M) Procedures.

Maintenance Forecast and Sign-Offs

Component Install/Removal Recording, 3rd Party Maintenance Sign-Offs, Workflow Support for Deferrals, Bi-directional M&E Integration, Line Maintenance Checks, Maintenance Task Initiation, Dent & Buckle Chart, Fluid Uplifts, Authority-Approved Electronic Sign-Offs.

Dashboard and Status Reporting

Real-Time Fleet Status Dashboards, Real-Time Alerts & Notifications, Crew Handover Module, Data Exporting (CSV/PDF/XML/API).

Document Management

Document Viewer, Document Hosting, Document Sharing, EFB Document Integration.

Device Syncing and User Capabilities

Multiple Deployment Options, Real-Time Device Syncing, True Electronic Signature, Unlimited Data, Offline Mode Capability, Calculated Fields, Self-Service Configurability, Version Control.

Implementation Support

Onsite and Remote Implementation Support, Approved and Used in all Major Regulatory Regions, Organization-Specific Forms, QR and Pin Code Validation for Aircraft ID, 24/7 Implementation and Post-Implementation Support, Built on Modern Software Stack.
